

Information so powerful you'll want to sit down.

Grab a seat and we'll show you 10 ways you can immediately improve your network security.

Hear From the Experts

REDSPIN

Redspin, professionals specializing in independent and objective network security auditing, will present the top ten security vulnerabilities they've uncovered while conducting hundreds of audits for small to mid-sized enterprises. The Redspin Security Team will also demonstrate a variety of attacks. The Login Attack uses sophisticated automated guesswork to glean passwords. The Crack Calculator shows the difference between cracking a simple 5 letter password and a complex 8 letter password using a brute-force password attack. Redspin will also demonstrate Laptop Cached VPN Credentials theft and Remote Compromise of an Internet Server.

In addition, they'll discuss practical mitigation strategies, firewall and remote access considerations, internal security risks as well as the inherent risk of complexity and technology.

GEMALTO

Combining their strengths of market and technology leadership, Axalto and Gemplus merged to form Gemalto, the leader in making personal digital interactions secure and easy.

Gemalto provides you with the security to be free:

- To authenticate on-line without the loss of identity
- To pay securely from anywhere, while avoiding the risk of fraud
- To communicate, access and share content via mobile devices with greater confidence
- To identify yourself for access to transportation, buildings and corporate networks...so we can live and work with security and freedom.

CITRIX

Citrix Systems, Inc. is the global leader and most trusted name in on-demand access. More than 180,000 organizations around the world use the Citrix Access Platform to provide the best possible access experience.

Last year, 57 million Americans received a phishing attack email. 49 million database records were stolen. 1043 brands were hijacked from companies who thought their networks were secure.

Is your network as secure as it could be? Are you next?

Join us for a free seminar, "10 Ways to Improve Your Network Security, TODAY!" and walk away with surefire ways YOU can shore up your network as soon as you get back to the office.

Don't miss John Abraham, President of Redspin and renowned white hat hacker Paul Haas as they show you how YOU might be susceptible to a security breach.

This event is by invitation only and seating will be extremely limited. Reserve your spot NOW at www.get-registered.com.

A few hours of your time, but imagine what it could save your company.

One attendee from each seminar will win a free proof of concept for a Gemalto Protiva/Citrix Access Gateway authentication solution delivered by a channel partner.
