

Prepare Today, Win Federal Contracts Tomorrow

Align with Redspin cybersecurity experts to achieve the level of cyber hygiene you need for CMMC certification. Redspin is one of the first to receive Certified Third-Party Assessment Organization (C3PAO) approval into the CMMC provisional program and has the required Provisional Assessor on staff to perform CMMC assessments.

THE BENEFITS

Understand Your Gaps

Recognize the risks and vulnerabilities in your business operations.

Improve Cyber Readiness

Implement the safeguards to protect data and shore up your defenses

Achieve CMMC Status

Conduct deep analysis to meet CMMC requirements.

THE CHALLENGE

The United States Department of Defense (DoD) is aiming to reduce the estimated \$600 billion in cybercrime losses impacting the nation's military supply chain every year by requiring third-party cyber security assessments of contractors with access to controlled unclassified information (CUI). The DoD is adopting the Cybersecurity Maturity Model Certification (CMMC) for its 300,000 Defense Industrial Base (DIB) contractors to meet varying levels of CMMC certification as a requirement to award a contract.

THE SOLUTION

CMMC recognizes security is not one size fits all, therefore the level an organization must meet is determined based on the type and sensitivity of information to be protected and the range of threats. Redspin, an approved CMMC Certified Third-Party Assessment Organization (C3PAO) and Registered Provider Organization (RPO), will help you assess or develop the cyber hygiene you need on your journey to becoming CMMC certified.

Redspin, an early adopter working with CMMC-AB to help define the program and as an approved CMMC C3PAO and RPO, our team understands CMMC requirements and follows professional conduct to help you on your journey to becoming CMMC ready and certified.

REDSPIN SERVICES

On your journey to become CMMC certified, Redspin's cybersecurity experts and trained assessors will help you become cyber ready and validate the effectiveness of your security.

Comprehensive CMMC Pre-assessment

Identify security gaps against the 17 controls (Level 1) outlined in the CMMC model.

Provide solutions based on US federal acquisition rules and NIST SP 800-171 r2.

Assist in the development of a System Security Plan and Plan of Action to becoming CMMC certified.

Remediation Process Optimization

Redspin is an approved RPO to remediate gaps found after a pre-assessment or CMMC assessment.

Develop policies and procedures, incident response runbooks, and best practices.

Implement processes and technology.

CMMC Assessments

Maturity Level 1-3

- Level 1 - Basic Cyber Hygiene (17 Controls)
- Level 2 - Intermediate Cyber Hygiene (72 Controls)
- Level 3 - Good Cyber Hygiene (130 Controls)

Redspin is an approved C3PAO to assess organizations aiming to achieve CMMC certification. Our assessment methodology is based on:

- US federal acquisition rule (48 FAR 52.204-21) mandating safeguarding
- DoD federal acquisition rules (DFARS 252.204-70xx Series) to protect CUI
- CMMC requirements and NIST Special Publication 800-171

Security Validation

For organizations with more sophisticated security programs, Redspin has a suite of services to test the efficacy of security controls against an adversary.

Validate the effectiveness of people, process, and technology.

Gain the level of confidence that security controls are working beyond CMMC certification.

Show the return on investment of security to an organization's board.

WHY REDSPIN

- Nearly 100 security advisors and assessors, ready to scale with you as needed.
- Possesses the know-how from performing over 1,000 assessments in highly regulated industries.
- Uplifts its service offering to validate your security, giving you the confidence that your people, processes, and technology are effective.

Redspin is the recognized authority in security validation for organizations in highly regulated industries to achieve cyber readiness. Fortune 500 and leading growth companies turn to Redspin to assess, build, and validate the safeguards to protect against the ever-changing threat landscape are working effectively. Our team is made up of nearly 100 security advisors with diverse industry experience with certifications including CISSP, CISM, CGEIT, CRISC, CISA, CBCP, CCIE, CCNP, CCNA, CHPH, CHRC, CHC, CIPP, CHPS, MCSE, SCSA, SCNA, CIA, ISSMP and ISSAP.
